

Forest Department has always given priority to the scientific management of Biodiversity in Sundarban Biosphere Reserve and such initiative help the managers to safe guard Tigers, its habitat and the human population as well as help in understanding the habitat utilisation pattern along with behaviour of this keystone species.

Wildlife wing of West Bengal Forest Department in collaboration with WWF, 'radio collared' a male tiger and was released in Sundarban Tiger Reserve for Assessing Tiger-Human Interactions through Radio-Telemetry.

The operation was conducted on 26 & 27 December in Harikhali beat under Bashirat range under Sundarban Tiger Reserve
